

# WORKFLOW

Automate, Prioritize, Optimize for Next Best Action

US Patent No. 10,679,284 B2

Currance Workflow is built on a patented 11-factor algorithm that not only automates and prioritizes workflows but empowers the team to identify and fix process failures for a more efficient Rev-Cycle.

## EMPOWER REV-CYCLE TEAMS

Increase the percentage of earned revenue being paid

Increase speed to get paid

Identify automation use cases

Dynamic work assignment allocation

Uplevel teams to less manual / more valuable work

## WORKFLOW

**Prioritize**

Based on patented 11 factor algorithm

**Automate**

Suppress and eliminate non-value work

**Optimize**

Analytics tell you what's happening today that impact decisions tomorrow

## REALIZED BENEFITS

**30%** Reduction in new hire training requirements

**25%** Increase in staff efficiency

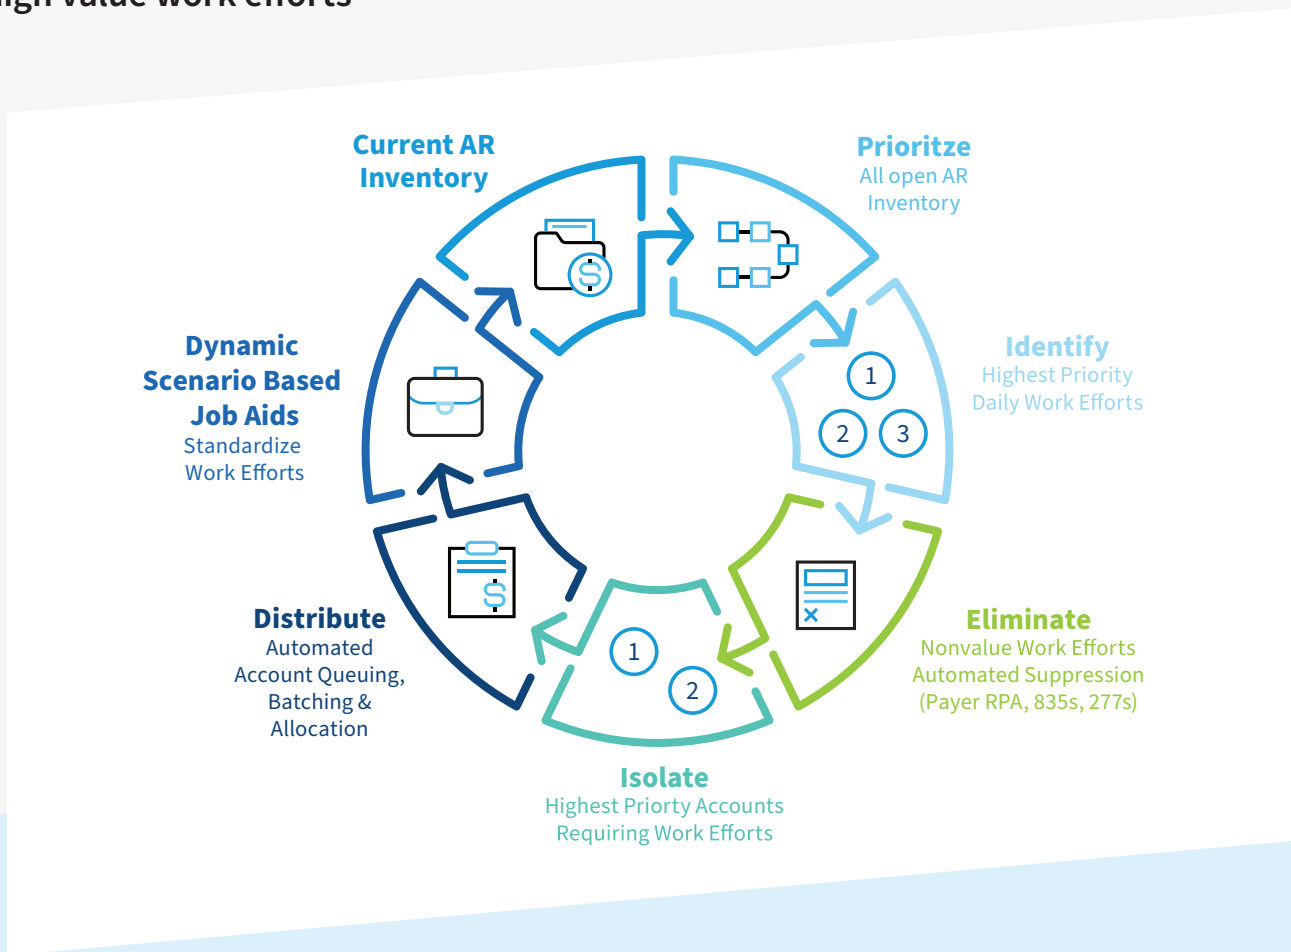

**15%** Reduction in manual work efforts

# WORKFLOW PRIORITIZATION & OPTIMIZATION

Priority accounts are always being worked first

## HOW IT WORKS

Algorithms & automation that eliminates nonvalue work efforts and keeps teams focused on high value work efforts

Automated account batching, queuing & allocation

One-click capabilities

Real time performance reporting

Streamlines onboarding of new team members & virtual teams

DISCOVER THE DIFFERENCE: PARTNERING TO TAKE REV-CYCLE PERFORMANCE TO THE NEXT LEVEL
